A *Plain* net headband is probably the easiest project to make.

The instructions given in the video and PDF file “Tying the Netting Knot and Creating Row 1” show how to start the headband.

Just be sure to check your pattern carefully to make certain that you have the correct size mesh stick and that you net the correct number of loops over that mesh stick. The wide headband has more loops than the narrow headband.

The video "Tying Row 2 and Beyond" shows how to net rows 2, 3, and 4. Just keep repeating the process described for rows 3 and 4 until you finish the number of rows needed for the headband.
